The Smokery in the Arcade Building.  
**THE ARCADE SMOKERY**  
L. W. Harriman, Proprietor  
WE HAVE ALL THE LEADING BRANDS

Out of Our Entire Allotment of Fuel Saving Ranges We Have Only a Few Left

Try this test at home (if your range is not a Laurel.) Put a handful of paper in the firebox, light it, open the direct draft damper and try to heat all the six top covers without heating the oven. You cannot do it. The flames will travel under three covers and then rush up the chimney or if you do heat the other covers it will take more coal and you'll have to heat the entire oven. This means a great waste of fuel especially if you have no baking to do. Come in and we will make this same test on a Laurel and then you'll understand why your neighbors and friends are so eager to praise its merits. We also give a beautiful set of Aluminum ware with every Laurel Range sold during this month.

Schlatter & Howards
